

Professional Development Seminar

Monday, 24 October 2022

18:00-20:00, Lecture Room 8.3 (L.Sofou Bldg)

Cybersecurity Managed Services for SMEs

Josmaarten Swinkels

Founder and CEO of Inter Engineering,
a Cybersecurity company active in South-East Europe for over 25 years.

Protecting an organization against the rapidly developing Cybersecurity threats is a hard task. And for SMEs often an impossible one. Many Cyber attacks don't look at the size of their targets. Which means that an SME is faced with the same challenges as large enterprises. But of course an SME doesn't have the people, the skills and most probably the budget for adequate protection. Teaming up with a specialized Cybersecurity Managed Service Provider (MSSP) therefore makes a lot of sense. In this presentation we will outline the Cybersecurity challenges SMEs are facing and how an MSSP can help providing a very good level of protection within the budget of the SME, allowing the SME simultaneously to focus on its own business.

- Participation is compulsory for Level 3 CS students
- Upon completion of the seminar series, certificates will be provided to attendees
